

RITIK

Devops Engineer

☎ 9650641731

📍 Dwarka Mor, Delhi

✉ ritik315cool@gmail.com

OBJECTIVE

DevOps Engineer with expertise in automation, CI/CD, and cloud tools (Docker, Kubernetes, Jenkins, AWS). Skilled in AI deployment and Raspberry Pi-based robotics setups. Aiming to streamline workflows and drive innovation in a tech-forward team.

EDUCATION

WORK EXPERIENCE

2025-NOW

One Simulation

Devops Engineer

- Managed secure, scalable AWS infrastructure (EC2, S3, IAM, VPC, ECR, Route 53) using Terraform and Ansible, with CI/CD in Jenkins for automated deployments, including Windows .exe and Raspberry Pi AI/robotics modules.
- Drove Docker and Kubernetes orchestration for resilient, scalable applications on AWS and on-premises, enabling secure, cloud-connected Raspberry Pi deployments with CloudWatch, Load Balancers, and Auto Scaling.

2025-NOW

BORGWARD

Aws Trainer Freelancer

- Delivered hands-on AWS training on EC2, S3, VPC, IAM, RDS, and security best practices, along with foundational Linux administration and cloud environment setup.
- Trained participants in practical cloud architecture, disaster recovery strategies, and real-world troubleshooting using AWS tools like CloudWatch, Load Balancer, and Auto Scaling to ensure high availability and system resilience.

2024-2025

TEAM COMPUTERS

System Engineer

- Managed on-premise server room operations and cloud-based production servers, overseeing hardware procurement, vendor coordination, and utilizing monitoring tools (CloudWatch, Zabbix, Nagios) to ensure system reliability, performance, and maximum uptime.
- Provided comprehensive IT support and remote assistance, minimizing downtime and effectively managing IT infrastructure and service operations across two geographically distributed branches.

2023-2024

TELEPERFORMANCE

IT Support Engineer

- Managed incident tickets, system configuration, desktop support, and cloud tools (Desktop Central, Tenable, EDR). Administered Active Directory for authentication, access control, and policy enforcement..
- Maintained server room operations and network infrastructure with a focus on performance, uptime, and security. Handled advanced network troubleshooting (LAN/WAN, IP, DNS/DHCP, firewall, switch/router configurations).

SKILLS

- **HARDWARE & OS :** TROUBLESHOOTING, WINDOWS SERVER, LINUX (UBUNTU) ADMINISTRATION.
- **NETWORKING :** CCNA, IP ADDRESSING, SUBNETTING, VLANS, ROUTING, SWITCHING, NAT, DHCP, DNS, VPN.
- **CLOUD COMPUTING :** AWS (EC2, S3, VPC, IAM, AUTO-SCALING, LOAD BALANCING, SECURITY, MONITORING). **GCP** (SERVICES: COMPUTE ENGINE, VPC, IAM, STORAGE, FIREWALL RULES etc).
- **IOT & EMBEDDED SYSTEMS :** RASPBERRY PI, ARDUINO (CONFIGURATION, DEPLOYMENT, MONITORING), AI-BASED TOOL DEPLOYMENT, ROBOTICS SYSTEM INTEGRATION & AUTOMATION.
- **VERSION CONTROL :** GIT, GITHUB/BITBUCKET.
- **CONFIGURATION MANAGEMENT :** ANSIBLE, CHEF.
- **CI/CD :** JENKINS, GIT, DOCKER, KUBERNETES.
- **INFRASTRUCTURE AS CODE :** TERRAFORM.
- **CONTAINERIZATION & ORCHESTRATION :** DOCKER, KUBERNETES.
- **LANGUAGES & SCRIPTING :** PYTHON (AUTOMATION), GROOVY (JENKINS), BASH (SYSTEM TASKS), YAML (K8s, ANSIBLE, CI/CD), HCL (TERRAFORM)

PROJECTS

- AWS Kafka infrastructure setup with Terraform, Ansible, and Jenkins for automation
Project Link - https://github.com/ritikgithub3105/kafka_infrastructure.git
- Dynamic inventory setup for Kafka infrastructure using Ansible Project Link - https://github.com/ritikgithub3105/Kafka_Dynamic_inventory.git

HOBBIES

- Morning Walk
- Yoga & Meditation
- Listening to Music
